TECHNOLOGY DESIGN INNOVATION

At Arbiton, technology merges seamlessly with the latest design trends to redefine what is possible in modern flooring solutions. Our commitment to staying at the forefront of innovation is reflected in our keen adoption of emerging design trends and our dedication to sustainable practices. We utilize advanced manufacturing techniques to craft flooring that is not only trend-setting but also environmentally friendly and durable. This strategic integration of technology and design ensures that each product meets the high standards of aesthetics and functionality demanded by contemporary spaces. Arbiton's approach is about shaping the future of flooring with every piece we create, making every space outstanding.

THIS YEAR'S **HIGHLIGHTS**

Feature groundbreaking innovations and cutting-edge designs that set new standards in the industry—each carefully curated to ensure they offer both style and functionality.

AWARD WINNING FLOOR

WITH **HD MINERAL CORE**®
AND ACULAY INTEGRATED ACOUSTIC LAYER

HD Mineral Core flooring with the Aculay Acoustic Layer represent a breakthrough in room acoustic insulation systems. This high-performance solution is crafted using the patented SPC Rigid HD Mineral Core technology paired with Aculay acoustic layer - achieving a noise reduction of 21 dB / 10 dB DELTA Lin (tested and certified by TFI Aachen Institute). This means the noise intensity is decreased by four times. This acoustic isolation is attained through a patented pressing technique

of the insulation layer, which forms a surface with subtle, irregular indentations and protrusions. Such a design optimizes flex, dispersion, and absorption of sound waves. Beyond its functionality, this acoustic system also embodies a novel approach to material processing and a clear commitment to ecological responsibility. In contrast to traditional acoustic floors that faced recycling difficulties due to intricate layer separation, Aculay breaks this mold by being entirely recyclable.

BEAUTIFUL AND PRACTICAL

Modern times become more and more hectic, full of challenges and responsibilities. We live fast, try to make the most of every single moment. We are pushed to look for new solutions, technologies and clever ways to adjust items all around us to meet needs and expectations. With this in mind, Arbiton HD Mineral Core® floor was created. This floor impresses and surprises with practicality. Inspired by nature, vinyl floors are entirely designed by European A.Design Studio. Created for people just like you, who get the most out of each moment and enjoy the life to the fullest. The Arbiton floor design not only matches the latest trends, but also go ahead of times and creates them. Thanks to the timeless design its beauty will amaze you every day. The pace of our life direct us towards solutions that will support and enhance us in everyday situations. That is why Arbiton HD Mineral Core® floors have been designed for their maximum comfort of use. Due to their advanced technical properties, they can be installed in any room without expansion joints between rooms. This allows to have beautiful, unified floor throughout the whole level of the apartment. With complete waterproofness and low thermal resistance they are perfect to fit in bathrooms with underfloor heating. They are easy to clean and antistatic, which prevents dust from adhering to them. Moreover, thanks to the innovative Antiscratch - Titanium Nano Layer they are up to 30% more scratch resistant. All of these features and properties mean that you get a floor which will meet the demands of our time. With Arbiton floor you can enjoy life thanks to not only its beauty but also a peace of mind with guaranteed unique functional properties.

HD MINERAL CORE®

Through innovative research in our laboratories, we have engineered the **HD Mineral Core®**, a state-of-the-art blend of natural rock minerals and sophisticated polymers. This precision-engineered mix ensures the flooring's peak performance and unparalleled durability. Proudly, our **HD Mineral Core®** stands out for its absence of phthalates and any plasticizers, highlighting our commitment to environmental safety and quality.

Additionally, this groundbreaking technology secures a 25-year warranty on our flooring, alongside superior thermal conductivity, making it the premier choice for underfloor heating solutions.

BENEFITS OF HD MINERAL CORE®

THE PERFECT FLOOR FOR UNDERFLOOR HEATING

The perfect floor for underfloor heating - maximize your energy efficiency with Arbiton flooring! Efficient heating starts with the right flooring - choose our highconductive option for underfloor heating.

OUR DIMENSIONALLY STABLE FLOORING

is designed to withstand daily wear and tear, year after year. Invest in long-lasting quality with our stable and durable flooring option. Prevent gaps and buckling for a seamless look.

THE SAME HIGH-QUALITY TECHNOLOGY IN OUR GLUE-DOWN AND CLICK FLOORING OPTIONS

Choose the installation method that suits your needs - our technology is available in both click or glue!

ANTISCRATCH LAYER

At Arbiton, we are committed to providing products that stand the test of time. Our **ANTISCRATCH TITANIUM NANO LAYER** is a testament to this commitment. This special coating layer is designed to offer unparalleled protection against scratches. Advanced titanium nano technology embedded within the layer enhances its durability, making it 30% more resistant to scratches compared to other vinyl flooring panels available on the market. This innovative approach ensures that our floors maintain their pristine appearance longer, offering peace of mind and sustained beauty in high-traffic areas. And, for those who share their home with four-legged friends, rest easy—our flooring can handle even the most enthusiastic tail wags and playful scratches. With Arbiton, you choose flooring that combines the ultimate in design trends with robust performance, making it a paw-sitively perfect choice for pet owners.

**ANTI-
SCRATCH**

**30%
MORE
RESISTANT SURFACE**

REAL WOOD STRUCTURE

High variety of designs means more natural impression of flooring. Perfect resemblance of wooden boards is a key benefit of our new collections. Minimum of 10 different planks in each colour means naturally flowing design without repetition of grains and knots.

For those who strive for the best looking floor and high durability we have prepared an absolute novelty. Our new collections is made using embossing technology perfectly resembling wooden structure on a planks.

The EIR (embossed in register) technology we are using allow us to achieve higher resolution of embossing, meaning higher density of details enriching surface of planks. Our design has more knots, grain, clear figure, small indentation that create real wooden characteristic of the plank. A beautiful matte surface will gently emphasize the beautiful finish of the floor.

TECHNOLOGY

FLOOR LOCKING TECHNOLOGIES

We make use of the reputable Välinge company's license to ensure the highest quality for our flooring products. By incorporating their innovative locking system into our floors, we guarantee durability and ease of installation.

FIRST 5G CROSS LOCKING SYSTEM **IN EUROPE**

5G Cross is Välinge's revolutionary floor locking technology that makes straight-set floor installations fast, easy, and effortless. It has a unique cross-component that makes it possible to install floors in rectangle and square patterns without panels moving or shifting. It's user-friendly, works with all materials and sizes, and is a perfect alternative to traditional ceramic tiles.

PERFECT CONNECTION

The bevel of a panel is yet another aspect that brings us closer to the authentic design of real wood planks. Arbiton's DESIGN BEVEL technology exemplifies this approach through its unique 4-sided V-groove, which seamlessly extends the design of the panel onto the bevel itself.

This innovative feature creates a remarkable visual continuity that mimics the look and feel of genuine wooden boards. By integrating the pattern and texture across the surface and into the bevels, Arbiton ensures that each panel not only resembles real wood but also enhances the overall aesthetic coherence of the flooring.

This attention to detail provides an added dimension of realism and sophistication, making it an ideal choice for those seeking the natural beauty of wood with the durability and ease of maintenance offered by modern flooring solutions.

DESIGN

COLOR OF THE YEAR 2024

TRENDS

In this chapter of our catalog, we explore the various interior design styles and how the shades and character of flooring can shape the overall look and feel of a space. The choice of flooring can significantly influence the ambiance, whether it's the clean lines of mid-century modern, the refined sophistication of quiet luxury, the free-spirited nature of boho, or the minimalist elegance of Japandi and wabi-sabi designs. Each style has its unique aesthetic, and selecting the right flooring can make all the difference in achieving your desired interior design. Let us guide you through these distinctive styles and help you find the perfect flooring solution to elevate your space.

PEACH FUZZ

Peach Fuzz, Pantone's Color of the Year for 2024, is a tender peach hue that captures the essence of a calm, inviting dawn. This color naturally complements interiors with light, bleached, and grey-infused floors, subtly enhancing the space's sense of openness and serenity. When paired with harmonious shades such as Brandied Apricot and Almond Peach, Peach Fuzz elevates the aesthetic, crafting interiors that are not only inviting but inherently stylish. The interplay of these colors with light flooring options effortlessly creates an environment of contemporary elegance and warm tranquility, embodying a refined design ethos.

DESIGN

Quiet Luxury epitomizes a sophisticated design ethos, foregrounding understated elegance in an era increasingly aware of socio-economic subtleties. This design trend champions a minimalist aesthetic in its visual presentation while embracing a maximalist approach to the quality and richness of materials. The blend of antique details with modern

elements creates a luxuriously subtle ambiance, integrating plush fabrics like velvet and linen alongside premium materials such as marble and polished hardwood floors. These choices convey a discreet opulence that aligns with contemporary values.

PERFECT
PEAR
PANTONE
16-0531

RAL 5002

QUIET LUXURY

Quiet Luxury diverges from the previous decade's emphasis on conspicuous consumption and moves toward a more considered expression of affluence. In a time characterized by economic shifts and a deeper social consciousness, this style offers a vision of luxury that is introspective and reserved. It promotes an environment where luxury is embedded in the quality and craftsmanship of the surroundings - a space where beauty and sophistication speak through the calm assurance of design that does not need to proclaim its value loudly. This philosophy not only elevates the aesthetic of the space but also supports a lifestyle where true luxury means finding richness in simplicity and elegance in restraint.

AMARON FORMA
AVEIRO SILVER
CAF 253

WABI SABI

Wabi-sabi, the Japanese aesthetic philosophy, emphasizes the beauty found in imperfection, impermanence, and simplicity. In interior design, wabi-sabi represents an appreciation for the raw, organic, and unrefined elements of life, promoting a minimalist approach and often incorporating handcrafted items and natural materials. This aesthetic uses a palette of subdued, earthy tones that instill calm and foster a connection with the natural environment. For flooring, concrete-patterned floors with their naturally imperfect textures and subtle, neutral shades ideally reflect the wabi-sabi spirit. Their rugged finish harmonizes with the philosophy of valuing the beauty of natural imperfections and the passage of time.

The reason for shifting the focus from oak to concrete-patterned flooring lies in the inherent qualities of concrete that align well with the wabi-sabi theme. Concrete's visually textured surface and its utilitarian, often flaw-marked appearance naturally embody wabi-sabi's appreciation for the beauty of the „imperfect, impermanent, and incomplete“. This makes concrete a suitable choice for evoking a serene, grounded aesthetic that complements the minimalist, nature-inspired elements of wabi-sabi interior design.

NCS S2005-Y60R

JAPANDI

Japandi, a unique fusion of Japanese and Scandinavian design principles, has emerged as a popular interior design trend that brings together the best of both worlds. By combining the simplicity and minimalism of Scandinavian design with the elegance and sophistication of Japanese aesthetics, Japandi creates a harmonious balance between form and function. This design style emphasizes clean lines, natural materials, and a neutral color palette, creating a sense of serenity and tranquility within the space. Japandi interiors often feature a mix of wood, stone, and natural textures, as well as an emphasis on craftsmanship and attention to detail. When it comes to flooring, oak floors with a subtle, muted color palette and a natural, matte finish perfectly complement the Japandi style, echoing the warmth and timeless character of this design philosophy.

MID-CENTURY

Mid-century modern is a design style that originated in the mid-20th century, characterized by its clean lines, organic shapes, and emphasis on functionality. This style pays homage to the iconic furniture designs and architectural trends of the 1950s and 1960s, often incorporating elements such as tapered legs, geometric patterns, and a mix of natural and synthetic materials. The color palette for mid-century interiors typically includes a combination of neutral tones, vibrant colors, and earthy hues, reflecting the optimism and innovation of the era. In mid-century spaces, minimal ornamentation and an open layout create a sense of flow and harmony, allowing the iconic furniture pieces and accessories to take center stage. When it comes to flooring, oak floors with a warm, medium-toned finish and a subtle grain pattern are a perfect match for the mid-century style, providing a timeless and elegant backdrop that complements the distinctive design elements and adds a touch of warmth to the overall aesthetic.

BOHO

Boho, short for bohemian, is an eclectic and free-spirited interior design style that embraces a mix of colors, patterns, textures, and cultural influences. Boho interiors are characterized by a relaxed and inviting atmosphere, often featuring an abundance of greenery, vintage furniture, and a variety of decorative accents. Layering different textiles, such as rugs, throws, and cushions, is a key element of this design style, as well as incorporating a diverse range of art, antiques, and travel souvenirs. Boho spaces celebrate creativity, individuality, and the art of self-expression. When it comes to flooring, oak floors with warm, rich tones and a slightly distressed or aged finish provide the ideal foundation for a boho-inspired space, adding an authentic, lived-in charm that enhances the overall aesthetic.

INNOVATION

FLOOR LOCKING 5G TECHNOLOGY

AMARON 《CHEVRON》

The Amaron Chevron collection is revolutionizing the flooring industry with its cutting-edge 5G click technology. This pioneering innovation guarantees an effortless and smooth installation experience, setting a new standard for convenience and efficiency. Unlike the complicated and time-consuming traditional methods typically required for intricate chevron patterns, the 5G click technology simplifies the process dramatically. This technology not only speeds up installation but also ensures a flawless alignment and secure locking of the flooring panels, enhancing both the aesthetic appeal and durability of the flooring. Amaron Chevron's commitment to innovation provides customers with a high-quality, stress-free solution for achieving the elegant look of chevron flooring without the usual complexities.

INNOVATION

REAL TILES MORE THAN JUST CERAMIC

FIRST 5G CROSS
MADE IN EUROPE!

AMARON FORMA

For this collection, we employ a revolutionary locking system specifically designed for ceramic-style flooring, enhancing the ease and precision of installation. The innovative 5G Cross Lock technology, featuring a unique cross-shaped mechanism, securely locks four panels in place, ensuring they remain perfectly aligned in a rectangular pattern set in a straight configuration. This advanced design significantly increases the overall strength, resilience, and durability of the flooring, preventing any shifting of the panels. The result is a flawless ceramic floor effect, achieved with the utmost simplicity and without the need for grout. This system not only simplifies the installation process but also elevates the integrity and longevity of the flooring, providing an elegant, maintenance-free solution that is ideal for modern living spaces.

Our collection introduces a special Pin feature that allows for the effortless removal of a single panel from the entire row. This addition to the innovative 5G Cross Lock technology enhances the functionality and flexibility of our ceramic design flooring. With this feature, you can easily replace or access a specific panel without disturbing the surrounding setup, making maintenance and updates remarkably straightforward. This thoughtful design element ensures that our flooring system not only delivers aesthetic excellence and durability but also offers practical benefits that accommodate the dynamic needs of everyday use.

STIQ XL WOOD

- WATERPROOF
- JUST GLUE
- IMPACT RESISTANT
- HOMOGENEOUS MATERIAL (100% PVC FREE)
- NO PAINTS AND LACQUERS
- VOC FREE
- PERFECT FOR RECYCLING
- DEDICATED TO VINYL FLOORING & CERAMIC

STIQ
MADE FROM 80%
OF RECYCLED
RAW MATERIAL

TORE MONOCOLOR

- SOLID CORE SKIRTING BOARD
- DEEP MATT SURFACE
- 100% WATERPROOF SKIRTING BOARDS
- FLEXIBLE CORE, PERFECT FOR ANY KIND OF WALL
- INSTALLATION WITH GLUE OR CLIPS
- GLUING CHANNEL

ENERGY SAVING FLOORING SYSTEM

STEP
1

Vapour barrier foil (SD150m) protects against moisture and features a system of adhesive tapes that secure against movement of the underlay

STEP
2

It enhances heating efficiency due to its high thermal insulation parameter; high compressive strength CS=500 kPa allows for the use of click vinyl, and thanks to its 5 mm thickness, it's possible to conceal cables connecting the heating films.

STEP
3

Protects the heating film from mechanical damage thanks to the soft non-woven fabric, additionally secures the system against moisture penetration from above. Easy connection due to the integrated tape.

THE TOTAL THICKNESS
OF THE **COMPLETE
SYSTEM** IS **10 MM**
(including floor).

RESPONSIBLE MANUFACTURING

Our floors are produced in the heart of Europe, where ecological awareness meets cutting-edge technology. By manufacturing locally, we significantly reduce our carbon footprint, and our advanced production process achieves zero waste status - we generate no waste. Moreover, all our floors are 100% recyclable, ensuring their sustainable use from production through to recycling.
